Education

The Iron Yard
Metro State College of Denver

2016
2007-2009

Projects

Financing API and Payment Portal

- Technologies: C# ASP.Net MVC, Razor, SQLite, XML, SOAP, WCF, Bootstrap
- Made to provide more functionality to a startup companies existing website.
- Aggregates data from the database and a form, then parses into a usable format to make 3 separated ping request to a financing services API using SOAP XML
- An Algorithm then parses the return data imbedded in the response XML and presents that data to the user to select from there financing options.

Blog Post

- Technologies: C# ASP.Net Core MVC, Razor, SASS
- A holiday themed blog built to experiment with implementing C.R.U.D functions and using dependency injection

Black Jack

- Technologies: C#, LINQ
- A console application simulating a single player game of black jack against a computer dealer. Built with using a combination of imperative and recursive functions.
